Substance Information Document

Tangerine oil

1. Substance identity

Name	Tangerine oil
Synonyms	Oils, tangerine Tangerine oil, expressed (*non-exhaustive list*)
IUPAC Name	N/A*
CAS	8016-85-1

*Non answered, IUPAC Name was not found.

2. Toxicological information

Tangerine oil (CAS No.: 8016-85-1; FEMA No.: 3041), which is the product of cold expression of the peel/rind of ripe fruit of Citrus reticulata Blanco var.

Acute toxicity – substance-related information is not available.
Irritation/corrosion – substance-related information is not available.
Sensitization – substance-related information is not available.
Repeat dose toxicity – substance-related information is not available.
Genetic toxicity – substance-related information is not available.
Carcinogenicity – substance-related information is not available.
Developmental and/or reproductive toxicity – substance-related information is not available.
Cardiopulmonary toxicity – substance-related information is not available.
